PROJECTS

ShopLoper

04/2024 - 05/2024 Remote

<https://shoploper.onrender.com>

ShopLoper is a platform that simplifies the creation of online shops without requiring any coding knowledge.

- Designed and developed a platform for simplified online store creation.
- Analyzed user needs to define essential features and optimize the user experience.
- Implemented advanced features like stock management, order tracking, and store customization.
- Integrated secure payment gateways and advanced search tools.
- Conducted rigorous testing to ensure quality and reliability.

Technical Environment:

Frontend: React, Bootstrap

Backend: Node.js, Express

Database: MongoDB

State Management: Redux

Communication: Axios

Security: JWT

Testing: Jest, Enzyme

SUMMARY

Passionate IT graduate with a background in freelance development and management experience in the textile industry. Having led teams and overseen operations, I returned to IT to focus on full-stack development, specializing in React, Node.js, and modern web technologies. I also have self-taught skills in Java, Angular, and Spring Boot, with a basic understanding of C++. Ready to contribute my blend of technical expertise and management experience to innovative projects.
